CDC Coalition

October 23, 2019

The Honorable Richard Shelby Chairman Senate Appropriations Committee Washington, DC 20510

The Honorable Roy Blunt Chairman Senate Appropriations Subcommittee on Labor, Health and Human Services, Education, and Related Agencies Washington, DC 20510 The Honorable Patrick Leahy Vice Chair Senate Appropriations Committee Washington, DC 20510

The Honorable Patty Murray Ranking Member Senate Appropriations Subcommittee on Labor, Health and Human Services, Education, and Related Agencies Washington, DC 20510

Dear Chairman Shelby, Vice Chair Leahy, Chairman Blunt and Ranking Member Murray:

As you work to finalize the FY 2020 Labor, Health and Human Services, and Education, and Related Agencies Appropriations bill, the 120 undersigned members of the CDC Coalition and other supporting organizations urge you to support at least the House level of \$8.22 billion for the Centers for Disease Control and Prevention's programs in any final FY 2020 Labor, Health and Human Services, and Education, and Related Agencies Appropriations bill. This total includes a transfer of \$225 million from the HHS Nonrecurring Expenses Fund for one-time projects to improve CDC research and campus infrastructure. With this level of funding, Congress will be able to provide additional funding to key CDC programs, prevent the elimination of any important CDC programs and fund important new initiatives critical to improving the nation's health.

The CDC Coalition is a nonpartisan coalition of organizations committed to strengthening our nation's public health infrastructure and prevention programs. Our mission is to ensure that health promotion and disease prevention are given top priority in federal funding, to support a funding level for CDC that enables it to carry out its prevention mission and to assure an adequate translation of new research into effective state and local programs. Coalition member groups represent millions of public health workers, researchers, clinicians, educators and citizens served by CDC programs.

CDC serves as the command center for the nation's public health defense system against emerging and reemerging infectious diseases. From aiding in the surveillance, detection and prevention of the Zika virus to playing a lead role in the control of Ebola in West Africa and the current outbreak in the Democratic Republic of the Congo to monitoring, investigating and helping to control the current measles cases and recent outbreaks in the U.S., to pandemic flu preparedness, CDC is the nation's – and the world's – expert resource and response center, coordinating communications and action and serving as the laboratory reference center. States, communities and the international community rely on CDC for accurate information and direction in a crisis or outbreak.

CDC is faced with unprecedented challenges and responsibilities ranging from combating the opioid, tobacco and obesity epidemics to emergency preparedness and chronic disease prevention. CDC funds programs for injury control and violence prevention; global health security; health promotion in schools and workplaces; the prevention of diabetes, heart disease, stroke, cancer, lung disease, arthritis and other chronic diseases; tobacco prevention and control; nutrition and physical activity; immunizations; reducing and preventing vector-borne diseases; HIV/AIDS prevention; environmental health, including the prevention of childhood lead poisoning; oral health; reducing health disparities; preventing infant mortality and birth defects; preventing antimicrobial resistance; preventing prescription drug overdose; improving the health and quality of life of individuals with disabilities; vision and eye health and public health research and health statistics. It is notable that more than 70 percent of CDC's budget supports public health and prevention activities by state and local health organizations and agencies, national public health partners and academic institutions.

In addition to ensuring a strong public health infrastructure and protecting Americans from public health threats and emergencies, CDC programs are crucial to reducing health care costs and improving health. Despite the progress CDC has made to meet these needs, the agency's programs have been woefully underfunded. We urge you to prioritize CDC funding and to support a funding level of at least \$8.22 billion for CDC's programs in FY 2020.

Please contact Don Hoppert at <u>don.hoppert@apha.org</u> or 202-777-2514 with any questions regarding our request.

Sincerely,

1,000 Days
