The Honorable Kevin McCarthy  
Minority Leader  
United States House of Representatives  
Washington, DC 20515

Dear Majority Leader McConnell and Speaker Pelosi and Minority Leaders Schumer and McCarthy,

The undersigned organizations represent consumers, family members, mental health and addiction providers, advocates, and other stakeholders at the local, state, and national levels that continue to provide critical care and resources to individuals and families during the COVID-19 public health emergency.

Given the orders from local, city, state, and national leaders for communities to shelter in place, the Centers for Medicare and Medicaid Services have broadened access to telehealth services and established payment parity under a temporary and emergency basis under the 1135 waiver authority and Coronavirus Preparedness and Response Supplemental Appropriations Act.<sup>1</sup> We applaud this decision to expand telehealth coverage for Medicare beneficiaries and strongly urge states to follow suit. **We request states to temporarily lift restrictions on telebehavioral health at all levels of care by telephone or video for individuals regardless of insurance plan and ensure payment parity<sup>2</sup> until the conclusion of this national emergency.**

Nearly 1 in 5 Americans have a mental health condition<sup>3</sup> and data from the National Institute on Drug Abuse (NIDA) states fewer than 10 percent of adults with co-occurring substance use disorders receive treatment for both disorders, and more than 50 percent do not receive treatment for either disorder.<sup>4</sup> We are now in an unprecedented time in our nation's history with the increase in isolation and uncertainty of the future potentially exacerbating mental health conditions, which underscores the need more than ever for great flexibility in care.

Studies of past pandemics, such as Severe Acute Respiratory Syndrome (SARS), show that children experience high levels of stress, anxiety, and confusion as a direct result of community

mitigation strategies designed to address public health pandemics.<sup>5</sup> While it is essential that we as a nation engage in community mitigation strategies to address COVID-19, public health experts recommend employing an organized mental health response to address the needs of children, adolescents, and adults both during and after a pandemic.<sup>6</sup>

The importance of shielding individuals with health conditions that place them at higher risk for severe illness from COVID-19 and ensure the safety and continuity of care they're currently receiving is paramount. Although several states have acted in scaling telehealth services over the years, there are still far too many gaps in access and coverage for the 43.8 million Americans<sup>7</sup> experiencing a mental illness. In order for providers and facilities to best serve the needs of their patients, we urge each of you to work together to allow for telebehavioral health coverage at all levels of care and parity reimbursement until the national emergency order is lifted.

The undersigned organizations thank you for your hard work in ensuring Americans can access their behavioral health care needs during this national public health emergency.

Sincerely,

2020 Mom
